

Lithofin Stove & Ovenglass Cleaner

Description

Ready-to-use alkaline cleaner with active cleaning substances and special grease and dirt-dissolving additives.

Features

Lithofin Stove & Ovenglass Cleaner quickly and effectively dissolves soot and burnt-on residues, making them easy to wipe off.

Technical data:

Density: approx. 1.0 g/cm³

pH value: approx. 12

Appearance: liquid, clear, brownish

Odour: non-specific,

Solubility in water: complete

Scope of application

For effortless cleaning of fireplace and oven glass, microwave, grill and oven panes, ceramic hobs and all types of fire-resistant glass.

Can also be used to clean baking trays, hobs, etc.

Processing

Floors, lacquered surfaces and other sensitive surfaces cover with plastic wrap, cardboard or a few layers of newspaper.

Set the nozzle of the sprayer to >spray< and spray dirty surfaces. Leave the foam on for a short time. Wipe off dirt with paper towels or a damp cloth and rub dry if necessary. After use, turn the nozzle to >closed<. For stubborn dirt, repeat the process or provide mechanical support with a hard sponge or cloth.

Please note: Do not use on hot surfaces.

Do not apply to alkali-sensitive surfaces, such as polished marble, anodised, lacquered surfaces, etc.

Coverage: up to approx. 15 m²/litre.

Storage

Closed and standing, cool, can be stored for up to approx. 4 years.

Environmental protection

The surfactants are biodegradable in accordance with Regulation (EC) No. 648/2004 (detergents regulation).

Disposal: Container is made of environmentally friendly polyethylene (PE) and recyclable. Rinsed containers can be disposed of and recycled via the recyclable material collection system (see note on label).

For information on labelling, transport and disposal, please refer to the safety data sheet.

Packaging

a) 500 ml bottle with sprayer (10 per box)

Please note that the environmental and safety information applies to the (concentrated) product in delivery form. If dilution is appropriate for the application, the classification may change.

This information can and should only provide non-binding advice.

The use of the products must be adapted to the local conditions and the surfaces to be treated. If there is no experience and in all cases of doubt, the product should be tried out in an inconspicuous place beforehand. (EN1.26gps/9.25)
