

Lithofin MN MN Power-Clean for all natural stones

Description

A special product from the LITHOFIN range for marble, natural stone and cast stone (MN). The mildly alkaline cleaning concentrate is free of hydrocarbons and low in odour. It contains a highly effective combination of dissolving and cleansing components for the best possible effect and cost-effectiveness.

Properties

Lithofin MN Power-Clean quickly and effortlessly dissolves and removes construction and general dirt, yellowed care product residues, self-gloss films, oil and grease dirt, light wax films and stubborn general dirt and much more.

Specifications:

Density: approx. 1.0 g/cm³
Appearance: liquid, yellowish
Odour: non-specific
pH value: approx. 10
Flash point: n.a.
Solubility in water: complete

Scope

- Thorough cleaning of heavily stressed, soiled coverings.
- Final cleaning of newly laid coverings.
- Supports the removal of cement haze from polished marble and limestone.
- Can be used indoors and outdoors.

Substrates: Surfaces made of polished, polished or rough marble and natural stone of all kinds, cast stone, artificial stone such as quartz composite, etc.

Processing

Dilute Lithofin MN Power-Clean with water up to approx. 1:10, depending on the soiling, and wipe the floor with it. For heavier soiling, dilute pure or up to 1:5 with water. Determine the appropriate dilution on a sample piece or sample area. Apply and spread with a scrubbing brush or similar. After an exposure time of approx. 15 minutes, brush through and pick up. Peel off larger areas with a rubber slider. Then wash well with clear water. Do not allow Lithofin MN Power-Clean to dry, if necessary add a little more water and brush again. In the case of heavier soiling, repeat the process with a higher concentration if necessary.

Please note: Avoid contact with sensitive surfaces such as fresh paintwork, wood, wallpaper, etc. We recommend testing in an inconspicuous area beforehand.

Coverage: up to approx. 10 m²/litre with concentrated application, over 30 m²/litre with diluted application.

Note: To remove wax layers etc., we recommend Lithofin WAX-OFF. For cement stains and rust discoloration in granite and gneiss, Lithofin MN Builders' Clean is suitable.

Storage

Store in a cool place, not above 25°C; can be stored for approx. 3 years.

Environmental protection

The surfactants are biodegradable in accordance with Regulation (EC) No. 648/2004 (detergents regulation).

Disposal: The container is made of environmentally friendly polyethylene (PE) and is recyclable. Rinsed containers can be disposed of via the recyclable material collection system (see note on label).

For information on labelling, transport and disposal, please refer to the safety data sheet

Packaging

- a) 1 liter bottle with child-resistant cap (10 pcs. in a box)
- b) 5 liter canister (2 pcs. in a box)
- c) 10 liter canister (single)

Please note that the environmental and safety information applies to the (concentrated) product in delivery form. If dilution is appropriate for the application, the classification may change. This information can and should only provide non-binding advice. The use of the products must be adapted to the local conditions and the surfaces to be treated. If there is no experience and in all cases of doubt, the product should be tried out in an inconspicuous place beforehand. (GB2.26/9.25)
